## 50 Dollars Reward.

AS decoyed from the subscriber, living in Fayette county, 7 miles Lexington, on the Lexington and Richmond Turnpike Road, on the 12th inst. by some nefarious wretch a NEGRO GIRL named CYNTHA. In her 19th year, of a slender delicate make, perhaps not more that 4 feet 6 inches high, very narrow feet, rather long visage; her color not so very black, though she is wholly of the African race. black, though she is wholly of the African race. She took with her a yellow linsey dress, two white musliu dresses, one brown figured silk dress, with some other clothing. Her escape is the most singular, as not the least suspicion rested upon her. She has left behind, her distressed parents and 7 full brothers, all younger than herself—the whole family living together. The above reward will be given for her res-

than herself—the whole family living together.
The above reward will be given for her restoration, if caught out of the State, and Twenty-Five Dollars if taken in the State, and all resonable charges paid in addition.
ALEXANDER CRAWFORD.

For the Kentucky Gazette. ESSAY ON BANKING.

PREFATORY REMARKS.

The following essay was commenced the beinning of last winter, and part written on evenings, after laboring through the day fully up to my strength. But the prosecution was interrupted by a severe and long illness, which was afterwards renewed and completed in a rough manner. In this order, I presume to present it to the public, in general, and particularly to the laboring class, to which I belong-with full confidence in their generosity-without revision or correction; not for want of respect; but for want of time, and bodily and mental strength .-I trust, therefore, that all errors, of every kind, will be excused—as my object is, to detect and expose that which is wrong, and to propose and recommend that which is right. It will be understood by the reader, that my illustrations, are not intended as literal facts: which are not necessary in establishing general principles; as in writing history. I have made some digressions, which were unavoidable at the time: for my mind was like a balky horse, that will not take a straight forward pull, but must be taken a small circuit, and brought into the road again. Some may charge me with egotism; but I prefer the singular pronoun, I, to the plural, weand had rather be charged with egotism, than wegotism; for the word, we, seems to imply that the writer is expressing the opinion of many, a thing, perhaps, of which he is entirely ignorant, or that he, himself, is many, or a host, equal to many. I dare not use the pronoun, we, although I hope there are many that think with me on the subject of banking-I do not know it.

## ESSAY ON BANKING

SECTION 1. The importance of this subject, I fear, is not generally appreciated by the people of these United States as it ought to bc. It is, in my view, one of deep and durable interest to every individual—and even to unborn generations.— I had hoped that some person of more leisure, health and mental strength would have pro-jected and presented, for public consideration. a plan adapted to our commercial interests both domestic and foreign, and at the same time, safe to our liberties, and just to the people. If such a one can be projected—if it has, I have not seen it. I, therefore, feel impelled to make an effort. I shall not attempt an historical ac-count of banking, nor a labored discussion of the subject, but shall merely introduce such facts, from memory, as I think calculated to il-lustrate and establish the defects and dangers of banking, as it is conducted in the United States; and present a just and safe system. I do not recollect the time when the first bank was established; but I recollect that the bank of Penn-ylvania in Philadelphia, was in operation. about the time the constitution of the United States was adopted, and the old bank of the U. States shortly after. They increased slowly for some years. The people did not rehish them well, on account of the surfeit they had of the old continental paper money. In 1802 the Kentucky Insurance Co. was chartered, which as the first Bank established in this State. In 1811 or '12, I think, the Bank of Kentucky with its branches, was established. In 1816 the late bank of the U. States was patented, for its charter was essentially a patent, and in 1817 a branch was established here. In the same year, I think, a bank, without branches, was established in this place, called the Farmers and Mechanics Bank Shortly after, perhaps in 1818, the nearly half hundred independent banks, as they were called, were established in this State. In 1819 or '20 the bank of the Commonwealth of Ky. with its branches, was established; then we had no more new banks for constitute 11 about. perhaps, 1831, when ranch was established here. In the same year for sometime, till about, perhaps, 1831, when the bank of Louisville was established; and then in 1834, I think, the present bank of Kentucky, with its branches, was established, and in the same year or 1835, the Northern Bank of Ky. with its branches was chartered. These, as well as I recollect, are all the banks ever established in this State, unless I should call the numerous host of self authorized ticket issues, banks, for some of them, perhaps issued nearly as much paper as some chartered banks.—
These plead justification from the scarcity of change; for gold and silver were seldom seen in

those clays, and these tickets were to supply the place of small silver money, from 64 cents to \$1, and some banks issued tickets as low, I think, people, worth just so much dirty paper. The Bank of Kentucky went on promisingly for three or four years, and then stopped payment for a while, and then resumed it; but was finally borne down, I believe, by the Bank of the U. This bank comes next in order, but I shall defer my remarks till last, as I have most to say about it. The Farmers and Mechanics Bank, I believe, conducted their business very fairly, but for reasons which I do not recollect, if I ever knew, soon brought it to a close. The half hundred Independent Banks commenced their career prancingly—they were not burthen-ed with gold and silver—they issued their notes promising to pay them in notes of the Bank of Kentucky; they soon began to depreciate, so that in a few hours, on a good horse, one could write 10 per cent. or more off their money, and that too in exchange for notes of the Bank of that too in exchange for notes of the Bank of Kentucky, which were themselves at 15 or 20 Kentucky, which were themselves at 15 or 20 he expected to sell for 250 or \$300, his crop, in per cent. discount in some States in the Union, and perhaps much more. The Bank of the and perhaps much more. The Bank of the Commonwealth of Ky. did not pretend to have a specie capital; but the lands belonging to the State; the stock in the Bank of Ky. and in short all the resources of the State were pledged for all the resources of the State were pledged for the redemption of its notes. This was the most honest and satisfactory base, that any Bank in

this region, was ever established on. And I have frequently heared sober minded, judicious men say, that if they wished to lay up bank notes, they would prefer the notes of this bank to any other in the Union. This was the people's bank. But the aristocracy contrived to depreciate them soon, perhaps in a year or two, to two or two and a quarter dollars for one.—

Though they were made by the Legislature, if have frequently heared sober minded, judicious men say, that if they wished to lay up bank notes, they would prefer the notes of this bank to any other in the Union. This was the people's bank. But the aristocracy contrived to depreciate them soon, perhaps in a year or two, to two or two and a quarter dollars for one.—

Though they were made by the Legislature, if I recollect rightly, a lawful tender in payment of the State revenue, and State land, and all debts due to the State, and would, if it had been well managed, in a few years have become been well managed, in a few years have become a specie paying bank. But notwithstanding a specie paying bank. But notwithstanding the powerful opposition to it, in six or seven years the notes rose to nearly par. But it was too democratic and liberal in its structure to be indured by the aristocracy—it was to this confederacy, what this confederacy is to European and Asiatic thrones. And it was, by the power of the aristocracy, finally annihilated. The Bank of Louisville, I believe, is going on verywell, and is in as good credit and useful as any well, and is in as good credit and useful as any other. The present Bank of Kentucky and its branches are going on very well, and are dis-posed, from all I have learned, to be very ac-commodating and useful. The Northern Bank of Kentucky and its branches, are, as far as

know, in as good credit as any other. To the best of my recollection, not one of the banks established in this State prior to the year 1830, furnished a sound, satisfactory circulating medium, nor even since, entirely so .-They all had their warnings, some more and some less. The Bank of the United States furnished much the best. But there was a time or times, prior to the year 1825, if I am no much mistaken, when some perplexing limitation in receiving the notes of some good banks and even its own branches existed. But from that period, to the close of its charter, it afforded the best paper medium we ever had. But with respect to nearly all the rest, a true, and yet respect to hearly an the rest, a true, and yet very ridiculous scene might be presented—men every where, almost, opened offices for money changing—some presented a very imposing appearance—bundles upon bundles of bank notes and notes of ticket banks-desks, books, clerks runners, &c., &c.; here you might see a man come in with a 3 or 5 or perhaps \$I bank note to get it changed for something current in the market, and when he had succeeded in getting the fruit of his hard labor changed, at perhaps a discount of 10 or perhaps 20 per cent., into ragged tickets, you might observe his countenance change from deep solicitude to smiling joy. Here you might see another come in with 500 or perhaps \$1000—can you change so and so? yes—on what term? so and so—you wight seems to the writhing of his countenance. might observe the writhing of his countenance—it is severe—circumstances are pressing—I must do it. And if you had occasion to go abroad, you might see the runners of these offi ces, rain or shine, frost or heat, under whip and spur, carrying bank paper home, to get other for it. So continued these operations for a season—I do not recollect how long. Some of these changers made perhaps from 50 to \$500 a lay. I know one poor man, who had a note of 7 or \$800 to pay in a certain bank—he col ected his money in a distant part of the State, and made sacrifices to get it in notes of the State Bank of Virginia, not doubting but that they would be received at par, as they were 10 or 12 per cent. better to the eastward than the

notes of the bank where he had to pay his note; but when he offered them the bank would not receive them; but would receive such and such notes—he then had to exchange them for such notes as the bank would receive at a considera ble loss, so that upon the whole transaction, he lost upwards of forty dollars, of his hard earnings. A countless multitude of similar cases. probably, occured, some of greater and some o ess magnitude, of which I cannot now speak

as I design to be brief. SECTION III. Another evil is, the absence of reciprocity for example—a company is chartered under the tyle and name of the President, directors and company of the Bank Z, to employ, say \$1,000,-000 in the business of banking, with certain exclusive privileges, professedly, to be sure, fo the public benefit. This million, is divided in to shares of \$100—these hundreds are to be paid in instalments of \$20. When one or two of these instalments are paid in, in fact or in fiction, the public does not seem to care much which-it is noised abroad that the Bank Z. in ready, or has commenced business-multitu resent their notes, payable sixty days after late, for discount, that is to swap them at 6 pe cent. per annum discount, or reduction, f notes of the Bank Z. payable on demand. No in order to make the evil above named manifest, and to confine myself to brevity, I shall from this multitude select but two or three per sons, whom I shall call F. M. and T. F. is

Farmer, just commenced house-keeping—he has 100 acres of good land, worth \$2000; he needs convenient buildings; he calculates that \$1000, with his own labor, will furnish them, and that if he can borrow the money, he can in ple ce of small silver money, from 64 cents to \$1, and some banks issued tickets as low, I think, as 25 cents, if not lower.

Section II.

Above, I have given a kind of catalogue of banks in this State, I shall now proceed to make some remarks on some, and may be, on all of them, if my desire for brevity does not restrain me. I shall begin with the Kentucky Insurance office, located in this place. The primarry object of the charter was to insure boats to New Orleans; but it soon became a banking company, and went on very well, and was in that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can borrow the money, he can in a few years, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can bords and he we year, from the products of his farm pay it; he applies to the Bank Z; he is made to understand that if he can pove it, he applies to the Bank Z; he is made to underst New Orleans; but it soon became a banking building with all his energies—soon completes buildings—they cost him in money, produce and his own labor \$1500—they are convenient and neat. He thinks now, within himself, if I into bad hands, and large issues of paper were and near, and then broke; leaving thousands, and perhaps hundred so f thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of the dress of thousands of dollars in the hands of the dress of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of thousands of dollars in the hands of the dress of the dr circumstances. But he can pay nothing the first year, for he has thrown all he can spare from his farm, into his buildings, and it is as much as he can do to pay the discount, or interest. He lays his plans for croping next year, and the the transfer of the discount of the second o and calculates that from his crop and stock he will be able then to pay half the debt. The season arrives—he ploughs and plants—every things appears promising; but a draught set in, and he does not gather more than half as much as he expected-his stock did not thrive well, and is unit for market—upon the whole he is a good deal straitened to meet his necessary expenses, and pay the discounts. But he hopes to do better next year. Next year comes—he sets to work vigorously—his stock looks thrifty—his crop appears promising; but he begins to feel unwell, and is finally, laid down with a severe and sickness; consequently his stock and crop are not attended to. He looses two or three horses, and several steers, which he expected to sell for 250 or \$300, his crop, in

it is advertised-the day of sale arrives-th times are hard, money scarce, but few people attend—the sale goes on, and by the time the amount is made every thing is sold—house and farm, stock and farming utensils, except a scruby milk-ow and young calf, a chunk of a horse, and a few other trifles—and he is not yet out of debt, he stores his physician and out of debt; he has to pay his physician and blacksmith—by the time this is done, he is poor blacksmith—by the time this is done, he is poor indeed. He gathers up the scattered fragments remaining, and trades them for a cart—into it he puts his last and only bed, a small oven and lid, a small skettle and tin coffee-pot, a half pound of ground coffee, (in case of sick-ness) a few tin cups und pans, a few pewter spoons and a few knives and forks, a pone of bread, a piece of bacon and a little meal; he hitches in his poney—lays in the bundle of clothing—sets in his second and third child, his wife with the youngest in her arms and the oldes's with their faithful dog, fall into the rear, to drive the cow and calf—they move on a while and halt, and look a long farewell, and then nove again toward some frontier, where wolve move again toward some frontier, where wolves and panthers are to be their nearest neighbors. The departing light indicates the approach of night. They come to a spring in the edge of a wood, near to which is a tree with thick foliage here they resolve to spend the night—he un-harnesses his horse, hobbles him, and turns him out to graze; he ties his calf to a bush, to keep his cow from wandering; he gathers some sticks and kindles a fire, meantime his wife milks; little milk from the cow—they now make their homely, but not unrelished meal; he then takes is Bible from his pocket and reads: "I have been young, and now am old; yet have I not seen the righteous forsaken, nor his seed beg-ging bread."—Ps. 37: 25. They then unite in worshipping God, and commending themselves to his care; they then lie down in peace, and awake in safety: he again opens his Bible, and reads, "Are not five sparrows sold for two farhings, and not one of them is forgotten before God? But even the very hairs of your head are all numbered. Fear not therefore; ye are of more value than many sparrows."—Luke, 12: 6, 7. Again they unite in worshipping God, and in imploring his protection, his support, and his vidance—they then make a hasty meal and et forward. And here I shall take leave of

them, for the present at least.

Some may think this case too strong and unnatural. But, I can, from my own knowledge, produce, if not exact such a case, as strong, or stronger, some of which I may hereafter state.

RODERIGO IN PRISON

Clanking his Chains. Whene'er with haggard eyes I view

This dungeon that I'm rotting in,
I think of those companions true,
Who studied with me at the University of Gottingen; niversity of Gottingen. Wipes his eyes and looks intently at his hand-

Sweet kerchief striped with heavenly blue. That first my love sat knotting in. Alas, Matilda then was true, At least I thought so at the U-niversity of Gottingen;

niversity of Gottingen. Barbs, barbs, alas! how swift ye flew, Her neat post wagon trotting in;
Ye hore Matilda from my view—
Forlorn I languished at the University of Gottingen; niversity of Gottingen.

This haggard form, this palled hue, These veins my blood is clotting in My years are many—they were few— When first I enterned at the U-niversity of Gottingen; niversity of Gottingen.

There first for thee my passion grew, Sweet, sweet Matilda Pottingen! Thou wert the daughter of my tu-tor, Law Professor of the U-niversity of Gottingen; niversity of Cottingen Sun, moon and thou vain world adieu

That kings and priests are plotting in; Here doomed to starve on water gruel, ne'er again to see the University of Gottingen; niversity of Gottingen. TRAGICAL ADVENTURE.

A CAVE IN KENTUCKY. We extract the following from an ineresting article in the American Month-

y Magazine for May, entitled "the Mamoth Cave in Kentucky :" Four or five miles from the Mammoth Cave, a few paces from the bridle path over the Knobs, by which the visitor, coming from Bell's at the Three Forks,

reaches it, is a cave known as the Pit Cave, though sometimes called, we believe, Wright's Cave, after the name of the person who first attempted to explore This man was a speculator, who, having some reason to believe that the cave was a valuable one, resolved to examine it but possessing little knowledge of caves and less of the business of the nitre maker, he applied to Mr. Gatewood, the proprietor of the works at the Mammoth Cave, and of course experienced in both these particulars, to assist him in the search. A day was accord ingly appointed, on which Mr. Gate wood agreed to meet him at the cave and conduct the exploration in person. But on that day, as it happened, there arose a furious storm of rain and thunder; and Mr. Gatewood, not supposing that even Wright himself, would, under such circumstances keep the appoint-

resolved to undertake the exploration himself. This the two men commenced, and pursued for several hours without accident and without fear, seeing, indeed, nothing to excite alarm, except a cluster of very dangerous pits, which they pass ed while engaged in the search. But by and by, having consumed much time in rambling about, they discovered that by some extraordinary oversight they had left their store of candles at the mouth of the cave, having brought with them only those they carried in their hands, which were now burning low. The horrors of their situation at once flashed on their minds; they were at a great distance from the entrance, which there was little hope they could reach with what remained of their candles, and the terrible pits were directly on their path. It was thought. however, that if they could succeed in passing these, it might be possible to grope their way from the cave in the dark, as the portion beyond the pits offered no unusual interruptions and was without branches. The attempt was made; and as desperation gave speed to their feet, they had at last the inexpressible satisfaction to reach the pits, and to pass them in safety, leaving them several hundred feet behind ere their lights entirely failed. But now began their difficulties. In the confusion and agitation of mind which beset them at the moment when the last candle expired, they neg-

lected to set their faces firmly towards the entrance; and in consequence, when darkness at last surrounded them, they were bewildered and at variance; Wright vehemently insisting that they should proceed in one direction, the miner contending with equal warmth that the other was the right one. The violence of Wright prevailed over the doubts of his follower, who allowed himself to be governed by the former, especially when the desperate man offered to lead the way, so as to be the first to encounter the pits, supposing he should be wrong.-An expedient for attesting the safety of the path, which Wright hit upon, had also its effect on his campanion's mind; he proposed as he crawled along on his hands and feet-the only way they dare attempt to proceed in the dark over the broken floor-to throw stones before him, by means of which it would be easy to tell when a pit lay in the way. The miner accordingly, with many misgivings, suffered himself to be ruled, and followed at Wright's back, the latter every monent hurling a stone before him, and at every throw uttering some hurried exclanation, now a prayer, now a word of counsel or encouragement to his companion, though always expressive of the deepest agitation and disorder of mind. They had proceeded in this way for seve eral moments, until even the miner himself, believing that if they were in error, they had crawled far enough to reach the pits, became convinced his employer was in the right path; when suddenly Wright, falling as if on the solid floor was succeeded by a rushing sound, the clatter of loose rocks rolling down a declivity, and then a heavy, hollow crash, at a depth beneath. He called to Wright; no answer was returned; all was dismal silence; not even a groan from the wretched employer replied to the call. His fate the terrified miner understood in a moment; the first of the pits was, at one point of its brink, shelving; on the declivity thus formed the stone cast by Wright had lodged, but Wright had slipt from it into the pit, and slipt so suddenly, as not to have time to utter even one cry of terror. The miner, overcome with horror, after calling again and again without receiving any answer, or hearing any sound whatever, turned in the opposite direction, and endeavored to effect his own escape from the cave. He wandered about many hours, now sinking in despair, now struggling again for life; until at last yielding to his fate, by exhaustion of mind and body, incapable of making any further exertions, a sudden ray of light sparkled in his face. He rushed forward,-it was the morning star shining through the mouth of the cave! The alarm was immediately given. Mr. Gatewood, with a party of his laborers, hurried to the cave and to the pit, on whose shelving edge were seen evidences enough of some heavy body having rolled into it. The offer of a reward conquered the terrors of one of the workmen, who was lowered with ropes to the bottom of the pit, a depth of 60 feet; and Wright's lifeless body was drawn out. The above tragical incident we have

heard confirmed by the lips of several different persons; one of whom, however, contested the right of the morning star to figure in it; affirming that the miner made his way out before night, and it was the light of day, shining at a distance like a star, which gave rise to that poetical embellishment: We believe he was

THE BEN SHERROD.

There is some degree of satisfaction in knowing that the late appalling and wanton destruction of human lives on board the steamboat Ben Sherrod is not passed by in utter indifference by the people residing on the Mississippi. A public meeting of the citizens of Natchez has been held for the purpose of inquiring into the facts connected with this most melancholy affair, and a committee specially charged with the duty of making the investigation have made a report of them, founded on the testimony within their reach. The report declares-

"That the steamboat Ben Sherrod left the city of N. Orleans, bound for Louisville, having on board upwards of two hundred passengers, inclusive of the crew, the steamboat Prairie leaving about the same time, for the same place: and that the said boats had been "racing" from the time they left New Orleans, until the fatal occurrence, which took place about 12 miles above Fort Adams, at 1 o'clock, on the morning of the 9the inst, the Prairie being a few miles ahead; that previous to that time said boats had passed and repassed each other some twice or three

"The Sherrod had been on fire, and was known to be so by the hands on said boat, sometime before the alarm was give en to the passengers in the cabins on the lower deck, and that ample time elapsed after the discovery of the fire, to have run the boat ashore and landed every passenger on her, she being then not exceeding 200 yards from the shore on the right hand side of the river, but that no attempt whatever was made to effect a landing, after the discovery of said fire, until several minutes had elapsed when the Captain, (C. G. Castleman,) finding that the boiler deck was in flames, ordered the pilot to run her ashore, but it was now too late, the wheel rope having been severed by the flames. The Cap. tain then ordered the engineer to stop the boat, but he had fled from his post thus leaving the boat under full headway, uncontrolled by the pilot, and bearing out from the shore farther into the middle of the river. The flames had now reached nearly to the stern of the boat, all was consternation and despair, the yawl suspended by pullies, was immediately fill ed with passengers, and in lowering it to the surface of the water, some one cut away the bow rope, which caused the yawl to be run down, and the loss of all within it. The remaining passengers and crew

were now forced overboard by the approaching flames. The report further states "that at the time the Sherrod took fire the hands on duty were in a state of intexication, having access at all times to a barrel of whistheir use, and that the engineer then on nished the fire men with large quantities

of brandy or other spirits, as an induce-

ment to keep up excessive fires, with a view of overtaking the steamboat Prairie,

then ahead of them." Severe censure is cast upon the captain of the Sherrod for his great indiscretion and neglect of duty, and for the great disregard manifested for the safety of his passengers. The Committee state that not less than one hundred and fifty lives were the sacrifice of this outrageous pro-

sequently offered and adopted, express coast of Mexico with four sloops and a sive of the sentiments of strong disap- schooner of war, to demand the release probation entertained in reference to the of the lately captured American vesses, conduct of the captain of the Sherrod, in and reparation for the injuries done our particular, and avowing the necessity of commerce." legislative action in order to render safe the immense trade and travel on the Mississippi.

A committee was appointed to memorialise the State Legislature on the sub- heard of barbarities inflicted upon Amer ject, and to pray that body to call the at- ican citizens captured on the high seas, rivers to it. -Baltimore Republican.

Additional particulars of the loss of the Ben Sherrod .- The Natchez papers contain further particulars of the deplorable loss of the Ben Sherrod. The notorious Thomas M. Thompson, commander of the Mexican man of war Gen. Bravo is now in this city, boasting of having fired on the unarmed boats of the ship Natchez, and having put a ball Mr. McDowell attributes the drowning into an American merchant vessel outside the bar. The shameless conduct of this man cannot be too deeply execrated.

The last mail from the interior brought information of Gen. Bustamente having assumed his official duties as President of the republic, and of a formidable "pronunciamento" at San Louis Potosi in favor of the Constitution of 1824; in contwo or three more are expected to march for San Louis via Victoria in the course of a few days. The war with Texas is literally blown to the winds.

From the New Orleans Bee, May 23. We have in our possession the original of the following letter, which we received by a gentlemen who arrived yesterday from Pensacola. The Champion is an American vessel and was taken under the American flag on the high seas .-Three of the prisoners, whose sufferings are described in this letter, are fe-

MATAMORAS, May 3, 1837. Dear Friend-I am not allowed to converse with any one, but I hope to see better days. We have suffered much, have been in a room 20 feet square-45 persons-the doors shut, and live animals too numerous to mention-nothing to eat for 60 hours. I wish you to publish our situation the first opportunity. -sloop of war. We are miserable. Publish this if you please.

In haste, yours, N. SHERWOOD. Masterschr. Champion. To J. B. MINCE, master Rob Roy.

From Vera Cruz.-The New York Journal of Commerce states that the bark Ann Eliza, Capt. Biscoe, arrived there on Saturday morning from Vera Cruz, having left that port on the 3d inst. The Mexican squadron was then at Vera Cruz, consisting of the brig Iturbide, of 14 guns; Libertador, 14 guns, and Vencidore, 13 guns. They had brought in as a prize the Texan armed schr. Independence, having on board Mr. Wharton, late Am-

bassador from Texas to the United States, The Ann Eliza was seized the morning of the 27th April, and the captain and mate taken on board the Mexican brig of-war Iturbide, by order, of the Commandante General Victoria. This act was said to be in consequence of the U.S. ship Natchez having captured the Mexican brig of war Gen. Urrea, on the 17th April. The Anna Eliza was liberated the evening of the 1st of May,

Letters from Vera Cruz say that the release of the Ann Eliza was in consequence of orders from the general Gov. ernment. The release of the Gen. Urrea by Commodore Dallas, was not yet known Vera Cruz.

The Ann Eliza brings \$22,300 in specie, desides a quantity in kegs, amount not known.

A PROMINENT EVIL OF THE TIMES. The newspaper press has greatly aggravated the pecuniary difficulties of the times, by the circulation of unfounded reports, and spreading and increasing the prevalent alarm. Prominent among the city of New York, which have not onclutches of those Mexican tigers, at the these (the Herald) has recently published a list of failures in which it has included several houses which have not failed, but which are of undoubted credit. Such a course is entitled only to unqualified ex-

## LEXINGTON.

THURSDAY,.....JUNE...... 8,.....1837,

The communication of a meeting of the citizens of Morgan county complimenting Judge Farrow, is unavoidably crouded out this week, but shall have a place in our next.

In our first page will be found the commencement of an Essay on Banking. Although there are some views taken by the author, to which we can take no exception, yet we wish it not to be understood, that his plan is approved by us. Perhaps, when our reagers have an opportunity one or two numbers,) we may be disposed to convictions, and that opinion is still un- must have a decided injurious effect. offer some consideration of our own on the sub- changed.

an giving a display of his prowess in making a hoped not fatally.

Will the corporation take no steps to arrest this dangerous practice?

Shin plaisters. Kentucky will soon be de- the base born. luged with these loathesom trash. Paris, Maysville, Richmond, and many others of the towns of our state, in direct violation of the spirit and letter of a law of 1817, passed for the express, may be anticipated.

Il is said that in Louisville and Frankfort, where the circulation of small notes is prohibited, there is no scarcity of silver change.

It is said there was 230,000 dollars in specie and about the same amount in notes, lost from on board the Ben Sherrod, when she was burnt.

We would fain believe, from recent events, to a blue light Hartford Federalist! that the call of Congress by the President, has relation to other matters than bank failures. — were so identified in the opposition to the The high handed course taken by Mexico-the war, and to Mr. Madison's administracondemnation of our vessels, and the imprisonment of our citizens, might seem to justify the trouble and expense of an extra session.

Gov. CLARKE spent Tuesday night in this city on his way from Winchester to Frankfort .--Those who conversed with the Governor, are of the opinion that he will not convene the Legis- last week, but for the want of room to lature. The Louisville committee, however, who repaired to Winchester to see him, and who returned through this place a few days since, have been informed, came to a different conclusion from conversing with him.

The Observer copies from the Louisville City Gazette, an account of the barbecue given to the godlike man near that city. Its conclusion is quite as "romantic" as was the circumstance of a lady giving her visiters Tea out of a pot, in which she had forgot to put any tea.— Here is the closing paragraph:

bade them all adieu, a rough, hard handed, honest fellow, went up to the carriage: 'Good bye old horse, said he. 'Farewell, my young friend,' replied Mr. Webster, shaking him by the hand, and the carriage drove off."

would probably be a short one, would as guessed at, by those who profess to have some knowledge in these matters, not cost the good citizens of this Commonwealth over from 20 to 40,000 dollars—a mere trifle to Kentucky, when it is designed for the benefit of monied corporation. Then, and the whole but siness system was in more than the present designed for the benefit of monied corporations of the support of the wat, we may put ourselves to some trouble to the had hoped that it might by his own hand.

In 1816, as now, the banks had suspensed despected payments, and the whole but siness system was in more than the present development and confusion. Then, are despected in any, his very prescriptions written out by his own hand.

They should have made it long ago; and they ought now to make it. The evil grows every day worse by in- are thus expressed in his first speech: dulgence. If Congress did not now make a stand, and stop the current while they about to reform the national currency.

Again:

He thus speaks of the law on the subgovernment to enforce that law:

" If Congress were to pass forty statspecie; and yet no regard was paid to the imperative injunctions of the law in this respect, The whole strength of the Government, he was of opinion, ought to be put forth to compel the payment of the duties and taxes to the Government in the le-

gal currency of the country. Notwithstanding Mr. Webster's opposition, the national bank was chartered. currency, and that the measure he had proposed was the proper remedy. He To the Citizens of Lexington. introduced a bill for that purpose, but it was rejected. He then introduced a resolution requiring the Secretary of the Treasury to enforce the existing law -This resolution "required and directed" measures "as soon as might be," to exclude from receipt for government dues, the bills of all banks which were not redeemed in specie on demand; and resolved that the enforcement of the requirement "ought" to commence on the 20th of February, after the passage of the Church, may be friendly adjusted. act. The resolution was intended to be, and is, upon the face of it, imperative; and has been so regarded by every Secretary of the Treasury since,

In support of this resolution, Mr. Webster made an elobrate speech; in the course of which, he said:

"He had, it was true, some objections against proceeding by bill; because the case was not one in which the law was tunately we have ample means of infor- deficient; but one in which the execution
